

SRINIVASAN G

Platform & Engineering Leader | FinTech, Platforms, Marketplaces, AI/ML
Bangalore, India | gsvasan@yahoo.com | [LinkedIn](#) | +91-9945503508

Executive Summary

Platform and Engineering Leader with 26+ years of experience building, scaling, and modernizing fintech, enterprise SaaS, healthcare, digital marketplace, and EdTech platforms. Led 6+ end-to-end platform and product initiatives from inception, including multiple 0→1 launches as a startup founder. Drove enterprise modernization at Clarivate, Vayana, and ACV, transforming legacy platforms into cloud-native architectures across regulated and multi-stakeholder environments.

Combines startup execution with enterprise leadership by building high-performing distributed engineering teams, leading technology transformation, and aligning platform strategy with business outcomes. Architected and delivered third-party integrations, led platform evolution across multiple initiatives, and applied AI and LLM technologies to risk intelligence, engineering productivity, and architecture discovery.

Selected Impact

- | | |
|---|--|
| 48% YoY growth supported across a dealer lending platform serving 2000+ dealers (ACV Capital) | 1,000+ dealers migrated in under 2 months with zero disruption to lending operations (ACV Capital). |
| \$1B+ financing transactions enabled across a multi-bank supply chain finance network (Vayana) | 40K+ end users served through modernization of a healthcare insights platform across 400+ enterprises (Clarivate) |
| 50,000+ Assessments and 40,000+ course completions achieved through a scaled EdTech platform (ArthaVidhya) | 6 → 130+ contributed to scaling of the Chennai engineering center during hyper-growth (ACV) |

Professional Experience

Senior Engineering Manager, [ACV Auctions](#), Chennai Mar 2024 – Mar 2026
ACV Capital — FinTech platform powering dealer financing across the ACV Auctions marketplace (24K+ dealers, \$760M revenue).
Contributed to scaling Chennai engineering center from 6 to 130+ employees during hyper-growth phase (ACV).

- Led engineering for dealer financing platform serving 2,000+ dealers, enabling capabilities that supported 48% YoY growth and increased dealer adoption.
- Built and led an 8+ engineer team across lending, onboarding, audit, and risk capabilities, expanding team capacity and partnering with cross-functional stakeholders to deliver strategic business outcomes.
- Led migration of 1,000+ dealers from a critical third-party audit platform in under 2 months, achieving zero lending disruption, eliminating vendor dependency & operational risk. Executed build-vs-buy strategy jointly with the product team.
- Redesigned dealer onboarding workflows, expanding financing eligibility to 500+ active dealers, increasing loan participation.
- Built rules-based risk credit-scoring system that reduced manual effort and improved consistency of lending decisions.
- Integrated Finicity, Experian, Salesforce, and accounting systems into lending workflows, improving data accuracy, reducing manual processing, and strengthening lending risk assessment.
- Resolved long-standing audit-system data integrity issues, reducing operational risk and improving compliance readiness.
- Defined strategy for explainable credit scoring and AI agent-based risk monitoring. Built an LLM-powered knowledge assistant to improve engineering productivity and accelerate architecture discovery.

Technology: AWS (S3, EC2), Python, Kafka, ReactJS, MySQL, Salesforce, NetSuite, AI/ML, Agile/Scrum

Platform Development - SVP, [Vayana Network](#), Bangalore Aug 2022 – Sept 2023
Supply chain finance network connecting 10+ banks, 700+ corporates, 5,000+ SMEs, enabling \$1B+ in financing transactions.

- Led platform engineering for a multi-bank, multi-tenant supply chain finance network, driving the transition from monolithic architecture to microservices to enable scalable partner onboarding and improve platform extensibility.
- Owned end-to-end migration execution across banking partners and enterprises, aligning technical execution with business priorities and implementing changes required for compatibility with existing systems, improving migration predictability.
- Built platform capabilities required to onboard two new banks, expanding network reach and transaction volume.
- Established security, governance, and compliance controls to support regulated financial transactions.

Technology: AWS (EC2, S3, SQS, SES, Fargate, DynamoDB), Kotlin, Java, Python, Ktor2, MySQL, ReactJS

Senior Manager – Technology, [Clarivate](#), Bangalore Feb 2021 – May 2022
Insights platform integrating content, analytics, and data applications serving 400+ enterprises and 40K+ users.

- Led a 20+ member cross-functional team, responsible for platform modernization, reliability, and delivery.
- Increased automated test coverage from 0% → 80% within 3 months, improving release quality and deployment confidence.
- Modernized healthcare insights platform serving 40K+ users, improving scalability, reliability, and cloud cost efficiency.
- Built Java-based API architecture supporting data science workflows while leading PHP-to-Java engineering upskilling.
- Resolved critical publishing and performance bottlenecks, improving user experience and operational efficiency.
- Delivered enterprise integration APIs that reduced onboarding effort for new enterprise clients.
- Implemented security and GDPR controls across platform and third-party integrations, reducing compliance risk.

Technology: AWS (EC2, S3, Lambda), PHP, C#, Python, Java, NodeJS, MySQL, Drupal, Salesforce, Pendo, Docker, Agile/Scrum

Senior Architect – Global Business, ESDS Solutions, Bangalore

Aug 2019 to Sept 2020

Led solution architecture for government and public-sector opportunities valued at ₹5Cr, translating business requirements into scalable cloud and platform solutions. Partnered with sales, delivery, and customer stakeholders to improve deal execution.

Director, [Accion Labs](#), Bangalore

Apr 2016 to July 2019

Built and led a 20+ member engineering team to develop and launch 0→1 lending and marketplace platforms for startups

- Built and launched a digital lending marketplace (MCAProtect) connecting funders, brokers, and MSME borrowers. Led a 10-engineer team responsible for platform architecture and digitization of the end-to-end loan origination lifecycle, integrating credit bureaus, bank-statement aggregation, e-signature, and Salesforce to streamline lending workflows.
- Led a 5-engineer mobile team to develop Android and iOS applications for borrower onboarding and document collection.
- Built and led a 6-engineer team to develop and launch a retail marketplace platform (mykala), enabling retailer bidding, order fulfilment, and integrations for payments, taxes, and shipping.
- Implemented AI-powered document ingestion and financial data extraction, reducing manual effort and improving efficiency.
- Developed blockchain proof-of-concept solutions for lending governance and supply-chain asset verification.

Technology: AWS, EC2, S3, Lambda, RoR, Angular, Java, NodeJS, MySQL, MongoDB, Redis, Solr, iOS, Android, Salesforce

Development Team Lead, Meridium (GE Digital), Bangalore

Apr 2015 to Mar 2016

Transformed CI/CD and quality practices across a 100-engineer organization, reducing test failures from 1,500 to fewer than 30, remediating critical security vulnerabilities, and leading a strategic database upgrade for all enterprise customers.

Co-Founder and Startup Leadership Experience - Head of Product Development, [MobiSir](#) | [ArthaVidhya](#) Mar 2011 to Mar 2015

Co-founded and scaled two EdTech ventures, leading product engineering, product marketing, and go-to-market execution from concept to early market adoption (0→1, 1→10).

- Built and launched a multi-tenant mobile-first learning SaaS platform (mXams) serving 5,000+ students and 10+ educators. Established strategic partnerships with BlackBerry, Nokia, and Samsung, expanding distribution channels and market reach.
- Built and scaled ArthaVidhya experiential learning platform to 50,000+ assessments and 40,000+ course completions, achieving adoption through industry and educational partnerships. ArthaVidhya became an [NSDC skill partner](#).
- Supported product incubation and platform development for emerging startups including [AhaGuru](#) and [Butterfly Fields](#).

Technical Project Manager, Protean Software ([Harman](#)), Bangalore | Reported to CEO.

Mar 2006 to Jan 2011

- Built and led engineering teams from scratch to develop enterprise software products for [Microsoft](#) and Ipswitch, driving predictable execution, high-quality delivery and a strong end-user-centric approach across the product lifecycle.
- Scaled and led dedicated teams of 20+ engineers for multiple ISV customers, owning end-to-end product execution, agile delivery, stakeholder relationships, team development, and successful multi-year product engineering engagements.

Technical Leader, MTS-2, Hughes Software, Bangalore | [Hughes Network Systems, USA](#)

Mar 2000 to Mar 2006

- Developed real-time event-processing systems supporting automation and alarm management for buildings of [JCI, USA](#).
- Coordinated build and release activities across engineering teams, helping to establish early agile development practices.

Software Engineer, Tata InfoTech Limited ([TCS](#)), Bangalore

Jul 1998 to Feb 2000

Technical Proficiency

- **Technology Leadership**: Platform Engineering, Platform Modernization, Distributed Systems, Microservices, API Platforms, DevOps, Security, Event-Driven Systems
- **Cloud & Infrastructure**: AWS, Azure, GCP, Kubernetes, Salesforce
- **Languages**: Python, Java, Kotlin, C#, Go, JavaScript, C/C++, SQL
- **AI & Emerging Tech**: LLMs, Claude, Agentic AI, RAG, MCP, Explainable AI, Blockchain
- **Domains**: FinTech, Supply Chain Finance, Healthcare, Marketplaces, EdTech, E-Commerce, Control Systems

Publication

Sidhayian, D., Bhatia, D., & Srinivasan, G. (2026). *GUS: A Graph Utility Score Framework for Method Selection in Fraud Detection*. Proceedings of the 4th International Conference on Data Science, Agents and Artificial Intelligence (ICDSAAI 2026), IEEE.

Education

Master of Science in Mathematics (Theoretical Computer Science), [College of Engineering, Guindy](#)

1996 - 1998

Bachelor of Science in Mathematics, [University of Madras](#) and [ICWA](#) - Intermediate

1993 - 1996

Professional Development "Extensive Vision AI – Basics and Applications". [The School of AI](#)

2020
